Hochschulaktionstag

All together now! Nationwide Hochschulaktionstag (hochschulaktionstag.de) on 20th November for better working and studying conditions at universities and research institutions!

We study and work in a chronically underfunded education and science system that prevents good research, learning and living conditions. Together, we are fighting against real wage losses and for good working and study conditions in the context of the collective bargaining round of the states. We need a change in education!

 Inflation compensation for ALL and no studying on debt!

 An end to precarious working conditions in science!

 For the financing of research and teaching!

Together we fight for better study and working conditions for all!

Let's Dance

You fancy to dress up and float across the dancefloor to nice music? On saturday, the 04.11., a math dance is being organized at the aula of the main building at 20 o'clock. There will also be a free dance course prior at 18 o'clock, entry will begin at 18.45 o'clock. You can get your tickets at the student council office from 12 to 14 c.t..

Funds for Students

The AStA and the student parliament offer various forms of help for students at our university, who might struggle with money. Amongst them a fund for contraception (www.asta-bonn.de/Verhütungsmittelfonds) Notably, there is a aid fund (www.asta-bonn.de/Stud._Hilfsfonds) and the free table (www.studierendenwerk-bonn.de/beratung-soziales/freitisch/) which lets you eat for free at the mensa.

Blood donation

On the weekdays you can donate blood in exchange for a small compensation and an afterwards snack in the University Hospital Bonn and on Wednesdays in the Anatomy which helps the clinic immensely. Appointments can be made per call or via the clinic's app, check out ukbonn.de. The latest information and a (preliminary) check if you are fit to donate as well as other requirements can be found there. Donate! It is a bloody good job.

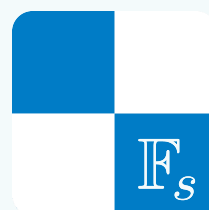

Riddle of the month

A small number of cards has been lost from Niklas' complete magic deck. If he deals among four people, three cards remain. If he deals among three people, two remain and if he deals among five people, two cards remain. How many cards are there?

The solution will be on the next loopaper.

Solution to last months riddle:

Lili chooses the "mixed"-Box and determines the rest from there.
